SUMMARY

Experienced developer specializing in enhancing Fintech services by developing high-performance applications, ensuring seamless data integration, and delivering user-friendly experiences. Proficient in Next.js, React.js, and Agile methodologies, with a strong focus on efficient and impactful project delivery. Passionate about exploring and leveraging new technologies, I am dedicated to driving innovation and creating applications that boost customer satisfaction and optimize business operations. As an award-winning developer and open source leader, I have initiated and developed standout projects such as `react-anticapture`, demonstrating my commitment to excellence, innovation, and knowledge sharing in the tech community.

EXPERIENCE

Software Developer

11/2023 - Present

PT Bussan Auto Finance

As a Software Developer, in BAF we build Fintech App for Internal company and Customer.

- Delivered high-performance Fintech applications using modern JavaScript frameworks and library, including Next.js, React.js, and React Native for Multiplatform Mobile Application.
- Ensured seamless data integration between frontend and backend systems, optimizing API consumption and data transmission.
- Prioritized app compatibility and user experience by conducting rigorous testing and troubleshooting across various platforms and devices.
- Embraced Agile methodologies to foster collaboration, adaptability, and efficient delivery of projects. Using Jira and Azure Git for implementing Agile.

Trainee

06/2023 - 11/2023

Enigma Camp

- Backend Development: Acquired expertise in developing robust backend systems using Java Spring Boot.
- Database Management: Designed and implemented CRUD systems and RESTful APIs, integrating with PostgreSQL databases for efficient data management.
- Frontend Development: Gained proficiency in building dynamic and responsive websites using Vue.js, React.js, Angular frameworks.
- Mobile Application Development: Developed cross-platform mobile applications utilizing React Native.
- Full-Stack Project Implementation: Successfully completed a full-stack project by integrating a frontend developed with Angular and a backend powered by Java Spring Boot.

Flutter Developer

08/2022 - 10/2022

Majapahit Teknologi

- Developed advanced HTTP networking and implemented GetX state management for logic architecture.
- Integrated Firebase for authentication (Anonymous, Google, Facebook, Email) and FCM notifications.
- Built custom widgets tailored to client requirements, following best coding practices.
- Collaborated with team members using GitLab for version control.
- Presented product demos to clients and ensured alignment with their expectations.
- Managed app deployment and release processes via Google Play Console.

Flutter Developer Internship PT Fhadira Inovasi Teknologi	05/2022 - 07/2022
• Implemented sleek and functional UI designs for the Inspektur Mobil mobile app, based on teammate-provided designs. • Developed using Dart/Flutter and integrated various third-party libraries to enhance functionality. • Contributed to the product under Fhadira Inovasi Teknologi.	
Flutter Developer Internship Majapahit Teknologi	01/2022 - 08/2022
• Acquired comprehensive knowledge of the Dart programming language and Flutter framework, progressing from foundational concepts to advanced techniques. • Developed various dummy applications to strengthen practical skills and understanding. • Gained mentorship and guidance from a seasoned Flutter developer at Majapahit Teknologi, enhancing technical expertise and industry best practices.	
Internet of Things Workshop (Instructor) Ingin Pintar Arafah	10/2020 - 10/2020
Teaching IoT (Internet of Things) to Collages Teacher as participant at Ingin Pintar Arafah, Solo, Central Java.	

EDUCATION

Computer Science BINUS Online University - Bachelor's degree	2025
Mobile Applications Zero To Mastery Academy	2023
Computer Science IDN Boarding School - High School Diploma	2020

CERTIFICATES

Hackathon Winner DFINITY ICP Blockchain Solutions (ICP)	Present
A blockchain-based voting platform integrating AI for face verification, Web3 for transparency, and Internet Identity for authentication. It ensures real-time, tamper-proof results with three canisters: backend for voting, AI-powered face recognition, and a frontend with face liveness detection.	
Fullstack Developer Certification ↗ Enigma Camp 120/EC-RC/ST231006012	10/2023 - Present

SKILLS

React.js	Javascript & Typescript
Next.js	CSS & SCSS
React Native	Canvas API

Animations (Framer Motion, Reanimated, Three.js)
Redux, Context API, Zustand
Tailwind & Bootstrap
Redux Form

Git Version Control
REST API
WebSocket
Webpack & Babel
